Profile

Computer Science undergraduate student with strong foundations in software development, Penetration Testing, and Security, seeking an internship in related domains. Experienced in building scalable ML-driven solutions, with strong analytical thinking, teamwork, and adaptability. Eligible to work in both the United Kingdom and India.

Education

Sardar Vallabhbhai National Institute of Technology **2024 – 2028**
B.Tech in Computer Science *CGPA: 7.28*
Rahul International School **2023**
Class 12 *Score: 87.2%*

Relevant Experience

Core - Event Lead **August 2025 – Present**
Nexus - DoCSE Cell
– Organised and executed **several events**, ensuring smooth event planning and coordination.
– Part of the organizing team of **E-Rakshak**, a joint hackathon between Surat Police and Nexus.
– Volunteered and contributed to the cell by supporting logistics, participant management, and technical coordination.
– Mentored **9 students** while contributing to daily operations, demonstrating leadership and teamwork.

Executive **September 2025 – August 2026**
Cutting Edge Visionaries
– Participated in the **Genesis AI/ML Bootcamp, won Runner-Up**, and supported day-to-day operations, demonstrating initiative and collaboration.

Projects

ForecastX **GitHub**
Tech: Python, Pandas, NumPy, Scikit-learn, XGBoost, yFinance, Matplotlib
– Built an AI-based stock price prediction system for long-term trading using machine learning and financial data analysis.
– Applied an ensemble of **Random Forest** and **XGBoost** to improve prediction accuracy and robustness.
– Developed a scalable pipeline for data extraction, preprocessing, model training, and visualization using real-time data.

Cognis Sentri **GitHub**
Tech: Python, OpenCV, DeepFace, NumPy, Scikit-learn, HTML, CSS, JavaScript
– Developed an AI-powered surveillance system for real-time face recognition and threat detection using computer vision.
– Built the recognition pipeline using **OpenCV** and **DeepFace** for known vs. unknown classification.
– Integrated frontend and simulated alert systems (buzzers and LEDs) for real-time response.
– Worked on reinforcement learning-based threat assessment and automated alert mechanisms.

Technical Skills

Languages: Python, C++, C, SQL
Developer Tools: Git, GitHub, VS Code, Linux
Security Tools: Nmap, Metasploit, Wireshark, FFUF, Hydra, JTR, Hashcat
Frameworks: Machine Learning, OpenCV, DeepFace, Burp Suite
Cloud/Databases: MySQL, foundational MSSQL
Soft Skills: Analytical Thinking, Teamwork, Problem Solving, Adaptability
Coursework: Computer Networks, Object-Oriented Programming, Database Management Systems, Data Structures and Algorithms
Areas of Interest: Red Teaming, Penetration Testing, Network Security, VAPT, Artificial Intelligence, Machine Learning

Achievements

- Completed the **Certified Penetration Testing Specialist (CPTS) Job-Role Path** by Hack The Box, covering network enumeration, privilege escalation, pivoting, and penetration testing methodologies.
- Completed the **Penetration Testing-1 (PT-1) Certification Path** by TryHackMe, successfully hacking 50+ machines.
- Completed the **Google Cybersecurity Professional Certificate** (Coursera), covering networking, Linux, SQL, SIEM, threat detection, incident response, and cybersecurity fundamentals.
- Runner-up at the **Genesis AI/ML Bootcamp** for **ForecastX**.
- Certifications in **DSA, Python (Udemy), Machine Learning (University of Michigan)**, and **Market Analysis (University of Geneva)**.
